Lat by Ob 32° 32'. N. Long by C. West

By Dr. Rueckenberger.

First

"O, had we some bright little Isle of our own,
In a blue, Summer ocean, far off and alone;
Where a leaf never dies in the still blooming bowers,
And banquets on through a whole year of flowers;
Where the sun loves to pause
With so fond a delay;
That the night only draws
A thin veil o'er the day;
Where simply to feel that we breathe, that we live,
Is worth the best joy that life elsewhere can give;—

Second

"Where, with souls ever ardent and pure as the clime,
We should love as they loved in the first golden time;
The glow of the sunshine, the balm of the air,
Would steal to our hearts, and make all Summer there.
With affection as free
From decline as the bowers,
And with hopes, like the bees,
Living always on flowers,
Our life should resemble a long day of light,
And our death come on holy and calm as the night!"

To my fair friend, Miss Maury, I write in a hurry
(And haste must excuse an abundance of faults,)
Requesting the favor, as I shall not need 'em,
Of returning the bottle of volatile salts

When, quite sentimental, you sadly are bent all
In tears, o'er some story of Cooper's or Galt's
You'll find it restoring—for fainting is boring—
So pray you accept of the volatile salts

Nay, do not refuse it; you may oft-times use it
In evenings fatigued with cotillion or waltz,
If better it find you, I do not remind you
Of when you first saw that same volatile salts

That night when you met me, a head-ache bestowing
. . . . . .
But beauty the soul ever suffering exalts—
Ere the hour of forsakings my head ceased aching
But my heart needed, lady, the volatile salts!

I pray you may never have cause to endure
To cure any ill 'neath the heaven's high vaults;
But had I the power, I would give at this hour,
A charm o'er them all to those volatile salts!

Bark Dryade bound to the South West Coast May the 12th 1846

Monday May the 12th Moderate breezes from N.by.W. Ship clost hauld on the wind heading to the N.E. latter part the wind veered to N.W. Ship steering N.N.East
Lat by ob 38..12 N° Ko. Longitude.

At Sea. April 19th 1850.

We the undersigned, do hereby acknowledge that we did secrete ourselves on board the American Barque "Cachalot" Wm L. Fales Master, unknown to him or his Officers, and on the date abovementioned came forward and reported ourselves to the Captain as stowaways; giving no other reason than wishing to work our way to California: and we do further bind ourselves to fulfill our duty as good and faithful Seamen, and in each and every way to be submissive to the regulations and discipline of the said Ship, and in recompense for our Services, are to receive $1 per month per man and are to remain by the Ship until she is discharged.

Valparaiso March 1851

Wilson Barstow,

Sir, I wrote you a few lines from "Panama", And not being able then to give the information requested, I will now try to do it in this — I wrote you that I should go to "Tobago I's" for "wood & Ballast", but after getting more information I found that "Ballast" was not very handy, And that "Wood" could not be got, And not having the facility to burn Coal, I thought I would proceed without either — But after getting out & having head winds it brought "Gorgona I's" in my track, And finding that it would be rather too risky to go in high Latitudes with the vessel so light, I stoped there a Day & a half & got all I wanted — Having unfavourable Winds, and not being in a very good sailing condition it took a month to get out of the "Bay", & after being so long getting as far as 1 6/10 South, where I should have had a strong breeze, instead of which, I had 9 Days Calm, And after working out of the "trade Winds" which was well to the Eastward, it carried me along about 3 weeks with light airs & calms till I got in Lat 42 South, then I was blessed with a fair Wind — And have been 3 1/2 months getting from "Panama" here — I have not had Wind enough to Reef a Topsail since leaving "San Francisco" —

You requested me to give you the Lat^{de} & Long^{de} of my doings, which I will do as it follows

"The cost of cargo taken for Cachalots use" is included in the Sales of Cargo, I only deduct it to give you a result, And to show you there was no excess of funds to remit at "Panama" which you supposed I might have, You will see that $ 307.18^{cs} is the only surplus I have of the Cachalots to pay her Bills with

Bark John G Tarleton
